

A Core Holding for Your Portfolio

Investors seeking income, appreciation and lower volatility may access potential opportunities across the capital structure in both stocks and bonds.

Focus On Income

One of the Fund's objectives is to provide investors with a potential stream of income from a well diversified portfolio of stocks, bonds and other income producing securities.

Goal: The Fund's strategy seeks to provide investors with monthly income to help supplement their cash flow needs

Seeks Capital Appreciation

Our focus on current income is thoughtfully balanced with the fund's objective for capital appreciation, to help sustain future income needs. The team seeks the best opportunities—across multiple asset classes—using the research insights of our global, experienced and well resourced teams.

Goal: The Fund seeks to provide attractive total return, to help investors preserve purchasing power

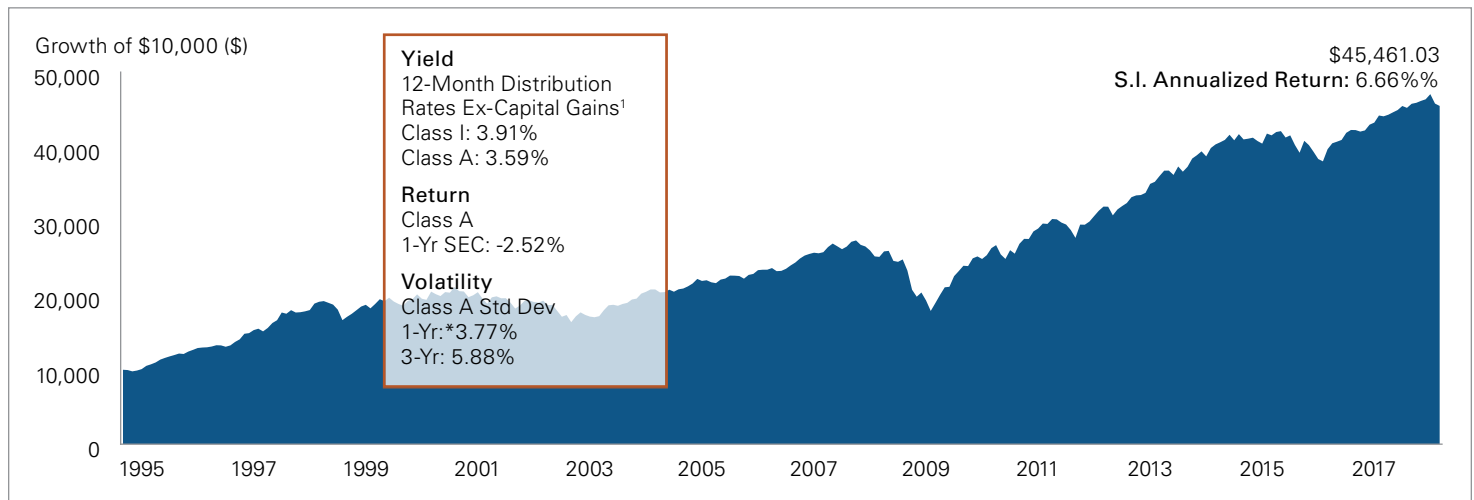

Lower Volatility

The portfolio managers' diversified investment approach and rigorous focus on company fundamentals and valuations, are key tools to managing the overall volatility of the Fund. Additionally, the team actively manages interest rate exposure.

Goal: For investors seeking income, the Fund strives to provide a smoother ride than equities, encouraging investors to focus on the long term across a variety of market conditions

Strong Results Over Time

Fund has produced strong yields and total return, while managing volatility

Source: GSAM. Data as of 3.31.18. The Fund's since inception performance begins at \$10,000, assumes reinvestment of dividends and does not reflect sales charges. Standard Deviation is typically represented in a 3 year period, the 1 year reflects the fund* changes.

Morningstar Risk-Adjusted Ratings: Allocation- 30% to 50% Equity Category- Class I Shares 3 Year 3 stars out of 423 funds, 5 Year 3 stars out of 354 funds, 10 year 4 stars out of 261 funds. Class A Shares 3 Year 2 stars out of 423 funds, 5 Year 3 stars out of 354 funds, 10 year 4 stars out of 261 funds. The Morningstar Rating™ is calculated for funds with at least a 3-year history based on a risk-adjusted return measure that accounts for variation in a fund's monthly excess returns. Exchange-traded funds and opened mutual funds are considered a single population. In each category, the top 10% = 5 stars, next 22.5% = 4 stars, next 35% = 3 stars, next 22.5% = 2 stars, and bottom 10% = 1 star. Overall rating is derived from a weighted average of the returns associated with its 3-, 5-, and 10- year (if applicable) rating, excluding all sales charges. Weights are based on the # of months of total returns: 100% 3-year rating for 36-59 months, 60% 5-year rating/40% 3-year rating for 60-119 months, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months. **Rankings for other share classes may vary.**

The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our Web site at www.GSAMFUNDS.com to obtain the most recent month-end returns.

The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted here. Please visit our Web site at www.GSAMFUNDS.com to obtain the most recent month-end returns.

Standardized Total Returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. Class A share return reflects the maximum initial sales charge of 5.5%. Because Institutional Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns.

The expense ratios of the Fund, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations) are as set forth above. Pursuant to a contractual arrangement, the Fund's waivers and/or expense limitations will remain in place through at least February 28, 2019, and prior to such date the investment adviser may not terminate the arrangements without the approval of the Fund's Board of Trustees.

* Effective at the close of business June 29, 2012, the Goldman Sachs Balanced Fund was renamed the Goldman Sachs Income Builder Fund. The Fund's investment objective and policies were also changed. Performance information prior to this date reflects the Fund's former investment objective and policies.

1. The 12 month distribution rate is calculated by taking the sum of all cash distributions over the past 12 months and dividing by the month end NAV in the last month of the period. Distributions may include interest from fixed income, dividends from equities, return of capital, and special distributions but excludes short term and long term capital gains distributions. Return of capital distribution may include a return of some or all of the money that an investor invested in Fund shares. Distributions from securities such as MLPs passing through the fund may also be characterized as return of capital. Special distributions may include any off-cycle distributions that occur outside of regular interest or dividend payment dates, such as when a company opts to pay a special dividend. The amounts and sources of distribution are not provided for tax reporting purposes. The Fund reports the character of distributions for federal income tax purposes each calendar year on Form 1099-DIV. Distributions will fluctuate over time and a large proportion of the distribution may occur at the end of the year in the form of capital gains. Distributions and market value movements affect the NAV of the fund and will also affect this calculation. 12 month distribution rate numbers are based on historical distributions and NAVs and are not predictive of future distributions or yields. 12 month distribution rate is calculated to provide a sense of the total cash flow associated with investment in the Fund, but should not be confused with 30-day SEC yield, dividend yield or interest yield. 2. Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk. 3. The method of calculation of the 30-Day Standardized Subsidized Yield is mandated by the Securities and Exchange Commission and is determined by dividing the net investment income per share earned during the last 30 days of the period by the maximum public offering price ("POP") per share on the last day of the period. This number is then annualized. The 30-Day Standardized Subsidized Yield reflects fee waivers and/or expense reimbursements recorded by the Fund during the period. Without waivers and/or reimbursements, yields would be reduced. This yield does not necessarily reflect income actually earned and distributed by the Fund and, therefore, may not be correlated with the dividends or other distributions paid to shareholders. The 30-Day Standardized Unsubsidized Yield does not adjust for any fee waivers and/or expense reimbursements in effect. If the Fund does not incur any fee waivers and/or expense reimbursements during the period, the 30-Day Standard Subsidized Yield and 30-Day Standardized Unsubsidized Yield will be identical. The Goldman Sachs Income Builder Fund seeks to provide income through investments in fixed income securities (bonds) and high dividend paying equities, preferred equities and other similar securities (stocks). The Fund also seeks to provide income by writing call options. The Fund seeks to provide capital appreciation primarily through equity securities. The Fund's investments in fixed income securities are subject to the risks associated with debt securities generally, including credit, liquidity and interest rate risk. High yield, lower rated investments involve greater price volatility and present greater risks, including greater liquidity risk, than higher rated fixed income securities. The Fund's investments are subject to market risk, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions. The Fund may invest in loans directly, through loan assignments, or indirectly, by purchasing participations or sub-participations from financial institutions. Indirect purchases may subject the Fund to greater delays, expenses and risks than direct obligations in the case that a borrower fails to pay scheduled principal and interest. Foreign and emerging markets investments may be more volatile than investments in U.S. securities and are subject to the risks of currency fluctuations and adverse economic, social or political developments. Derivative instruments may involve a high degree of financial risk. These risks include the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instrument; the risk of default by a counterparty; and liquidity risk (i.e., the risk that an investment may not be able to be sold without a substantial drop in price, if at all). The Fund is also subject to the risks associated with writing (selling) call options, which limits the opportunity to profit from an increase in the market value of stocks in exchange for up-front cash at the time of selling the call option. In a rising market, the Fund could significantly underperform the market, and the Fund's options strategies may not fully protect it against declines in the value of the market. Different investment styles tend to shift in and out of favor, and at times the Fund may underperform other funds that invest in similar asset classes. Investing in Real Estate Investment Trusts ("REITs") involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. REITs whose underlying properties are concentrated in a particular industry or geographic region are also subject to risks affecting such industries and regions. The securities of REITs involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements because of interest rate changes, economic conditions and other factors. Investments in master limited partnerships ("MLPs") are subject to certain risks, including risks related to limited control and limited rights to vote, potential conflicts of interest, cash flow risks, dilution risks, limited liquidity and risks related to the general partner's right to force sales at undesirable times or prices. The Fund's investments in pooled investment vehicles (including other investment companies, exchange-traded funds, REITs and MLPs) subject it to additional expenses.

All or a portion of the Fund's distributions may be treated for tax purposes as a return of capital, however, the final characterization of such distributions will be reported annually on Form 1099-DIV. The final tax status of the distributions may differ substantially from the above dividend information.
